

01

HealthGates® Hub (ePA)

Advancing Primary Care

Share medical information in real time with minimal human intervention. The best HealthGates® hub to ensure all patients get the right treatment at the right time.

Changing the Way Healthcare Stakeholders Interact

By focusing on Patients, Pharmaceuticals, Providers, Payors, and Pharmacies (the Five P's), we ensure seamless communication and streamlined processes for the benefit of all.

Patients, Pharmaceuticals, Providers, Payors, Pharmacies, Patient Advocacy

Digitizing Prior Authorization

HealthGates® digitizes prior authorization by replacing paper forms with an electronic system. This electronic system allows healthcare providers to submit authorization requests quickly and securely including Providers, Bio-Pharma, Payors, and Pharmacies.

By digitizing this process, HealthGates® aims to reduce the time and effort it takes to get approval for medical treatments, ultimately benefiting both patients and healthcare providers.

02

MyMedQR

MyMedQR is a comprehensive mobile application designed to give individuals full control over their personal medical records. With MyMedQR, you can effortlessly manage and update information such as

allergies, treatments, chronic conditions, current medications, surgeries, implants, blood types, and more. The app ensures that your health data is always at your fingertips, ready to be shared securely with healthcare providers when needed.

- Real-Time Data Sharing: Securely share your medical information, including treatments and allergies, with healthcare providers not directly involved in your care, ensuring they have the most up-to-date information.
- Dynamic Integration: Automatically updates with each change in your treatment regimen and integrates seamlessly with Electronic Health Records (EHRs) and DocuSign for efficient consent management.

03

MyPetQR

Recognizing that pets are family too, we developed MyPetQR to provide pet owners with a reliable tool to manage their pets' medical records. This mobile application allows you to carry your pet's health information, including immunizations, allergies, treatments, and current medications, wherever you go.

- Real-Time Data Sharing: Facilitates secure sharing of your pet's medical information with veterinarians and other care providers, ensuring they have access to accurate and current data.
- Dynamic Integration: Automatically updates with each change in your pet's treatment regimen and integrates seamlessly with Electronic Health Records (EHRs).
